### Profile

- As an entrepreneurial personality, you are result and customer focussed and you thrive in a dynamic environment with lots of personal responsibilities and limited formalities. You are a team player, flexible, creative, and eager to learn.
- Preferably you have a University Degree or equivalent by experience.
- Proven (5 - 10 years) experience in designing, developing and implementing BI solutions.
- You have been involved in managing the delivery of BI projects. This includes requirements definition, technical design and development, accountability for project deliverables and timelines, managing risk and project scope.
- You have experience with one or more BI solutions.
- Knowledge within the Pharmaceutical industry is a plus
- You are assertive and communicative, enabling you to work and network at multiple levels within large organisations. You have the ability to guide and develop staff. You are fluent in English and either Dutch or French.
